Q: Cannot 'expand to code' in Clean RTM Release because of reference to project file I have been working in TFS for the past 5 years, I have lots of experience at this stage and I can create new projects in TFS in some minutes. I am working on a project that was created about 10 years ago, the version for this project is: "version number 7.0". I am trying to update the version in my PC to the latest version, that is: "version number 9.0". When I create my solution in my PC, I go into the version > right click on the project > click on "expand to code". I run the project but when I get to the "Build" button, I get the error: "Cannot 'expand to

code" from the "Build" button. I have searched this error and I found out that the problem is with a reference to the project file that was created in some previous version, that is: "version number 7.0". I have tried to fix this without success. I have also tried to solve this by deleting the references from the solution, but then I get another error that says: "project references could

Intracisternal administration of anti-HIV-1 neutralizing monoclonal antibodies enhances apoptosis in human cerebral microvascular endothelial cells. Considerable evidence has demonstrated that many neuropathological features of HIV-1 infection or AIDS involve both dysfunction of the brain endothelium and direct viral attack on neural cells. Human umbilical vein endothelial cells and primary human astrocytes cultured in vitro were used to study the effects of HIV-1 neutralizing monoclonal antibodies (nMabs) on apoptosis in human cerebral endothelial cells. At a concentration of 15 microg/ml, two murine nMabs, 2F5
